Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over PATENT ABSTRACTS OF JAPAN vol. 1996, No. 9, 30 September 1996 (1996-9-30) & JP 08 128219 A (SATO KOGYO CO LTD: OOKURA SHOJI KK), 21 May 1996 (1996-5-21) in view of PATENT ABSTRACTS OF JAPAN vol. 014, No. 363 (G-0746), 7 August 1990 (1990-8-7) and JP 02 131785 A (NIPPON TELEGR & TELEPH CORP), 21 May 1990 (1990-5-21). Abstract

128219 discloses a cardio-training apparatus comprising a device for smooth interactive control of a film. At each crossing, the user can choose between a number of directions. The document discloses direction-controlling means comprises a handlebar whereas in claim 1 the direction-controlling means comprises a number of buttons each corresponding to a direction in space. It would have been obvious to use buttons in lieu of a handlebars, as it is a well known alternative for controlling an input.

128219 does not disclose a sound output.

131785 discloses a sound output.

It would have been obvious to use 131785's sound output with 128219, as sound outputs are well known in the art.

As for claim 2, the use of a lever is inherent in document 128219.

As for claim 3, 131785 discloses the use of a speed pickup.

The specific constructions of the speed pick-up as specified in claims 4, 5 and 6 are only normal alternative possible constructions of the speed pick-up 4 in the device described in document 131785.

The method claims 7-11 are inherent in the corresponding apparatus claims and are rejected for the same reasons.
